

## The Aviation Group meets the third Thursday of each month at 2 pm.

- We like to talk about all things aviation where members suggest topics of interest to present and discuss.
- Preferred topics include current issues in aviation such as...
  - \* Boeing aircraft losing doors
  - \* forthcoming supersonic commercial travel
  - \* the implementation of artificial intelligence (AI) in the aviation industry, and
  - \* significant historical events in the aviation industry
- When the weather is nice, we like to take field trips to air shows and museums.

If interested in attending, please call Don Mobley at 07398 300 952
